

Catch report form for Sea Trout in Tana River mouth area

Anglers may use this reporting system to report their catch of Sea Trout in the Tana River mouth zone (Langnes – River Mouth). This allows anglers to report their catch in bulk. Alternatively you may report your catch by SMS, or internet (www.scanatura.no). There you have to report each fish at one line (single report). There are no possibilities for bulk report at internet or SMS.

Remember to give up both number of fish and weight. There should be a scale at Kaldbakknes.

All anglers must report their catch Sea Trout and Arctic Charr!

We would also like to be informed of catch of white fish at the river mouth

Remember to give up your name or license number:

Sum up of fishing rules in the Tana River mout area:

- Fishing season: 15th of July 31st of July (no weekly restriction as in the rest of the watercourse)
- Visiting anglers are also allowed to use lures and worm as bait.
- Visiting anglers must be accompanied with a local angler when angling from boat. Only boats with local number plates are allowed to angle from.
- All Trout and Arctic Charr less than 25 cm must be released

TF ask anglers to release Arctic Charr and Whitefish caught in the river mouth.

Note that the lower management boarder (river – sea) is moved further down before the 2015 season.

This form is to be delivered at *Esso Rustefielbma*, or at *Tanavassdragets fiskeforvaltning*, Ringveien 41, 9845 Tana bru.
